

Green Bond Impact Report 2026

Overview

CPP Investments became the first pension fund manager to issue a green bond in 2018 and remains a consistent issuer in the green bond market. Green bonds provide an additional source of funding for eligible investments, as defined in our Green Bond Framework “Framework” and reflected in our Green Bond Register “Register”.

To date, CPP Investments has issued eleven green bonds and completed one tap issuance, totaling more than \$11.6 billion in gross proceeds.¹ Issuances have been denominated in Australian dollars, Canadian dollars, euros and U.S. dollars. Eligible assets are considered and approved by our Sustainable Investing Committee in accordance with the Framework.

As of March 31, 2026, the Framework includes:

Renewable energy

Acquisition, development, generation, transmission and distribution of renewable energy including wind power, solar power and green hydrogen.

Green buildings

Purchase, development and/or redevelopment of properties that are, or are expected to be, certified as LEED Gold or Platinum or equivalent levels in other certification programs.

Low carbon/clean transportation

Development, deployment and operation of clean transportation assets including in public and private transport.

Energy efficiency

Development, deployment and operation of technologies, products, or systems that provide significant improvements in energy efficiency (>30% per International Energy Agency and EU Taxonomy).

This report covers the period from April 1, 2025 to March 31, 2026 and is based on our 2025 Framework published in July 2025. The 2025 revision of the Framework incorporates updates to align with CPP Investments' approach to climate change and broader sustainability-related disclosures. The Framework received a Dark Green rating—the highest possible rating—from S&P Global Ratings, a leading provider of Second Party Opinions (SPOs) on the qualification of debt for green bond status.

Allocation of net proceeds and reported impact metrics are presented in accordance with the Framework. Additional information about our green bond program, including previous Registers, can be found on our website. Unless otherwise noted, all figures are presented in Canadian dollars. Investment values and allocations are based on the cost of investment.

Green bond impact summary

Fiscal year 2026

Notional allocation of net proceeds by eligible category

70.6% renewable energy

4.2% energy efficiency

25.2% green buildings

Outstanding amount of net proceeds at end of reporting period

\$11.3B of net proceeds from green bonds

\$12.3B in eligible investments

Breakdown of notional allocation of net proceeds between new and existing investments²

\$12.3B of eligible investments are comprised of:

95% existing investments

5% new investments

1. Gross proceeds of bonds issued over the life of the program are calculated using foreign exchange rates as of their issuance date, while net bonds outstanding are calculated using foreign exchange rates as of March 31, 2026. This calculation variance is to account for any bonds that have matured prior to March 31, 2026.

2. New investments are assets added to the 2026 Green Bond Register. Existing investments are all assets included prior.

2026 Green Bond Register¹

Year ended March 31, 2026

The Green Bond Register documents the net proceeds of green bond issuances and their allocation to eligible assets. Below is the complete 2026 Green Bond Register.

	Currency	Local Currency	CAD Equivalent
Bonds			
CPPIBC 3 06/15/28	CAD	2,455,930,000	2,455,930,000
CPPIBC 0.875 02/06/29	EUR	995,390,000	1,600,540,337
CPPIBC 0.25 04/06/27	EUR	994,280,000	1,598,755,509
CPPIBC 2.414 02/25/41	AUD	149,763,000	143,145,273
CPPIBC 2.79 03/12/41	AUD	119,815,200	114,520,806
CPPIBC 1.5 06/23/28	AUD	747,390,000	714,364,330
CPPIBC 4.1 09/01/26	AUD	498,365,000	476,343,247
CPPIBC 3 1/8 06/11/29	EUR	998,250,000	1,605,139,082
CPPIBC 4.7 07/19/27	AUD	999,170,000	955,018,676
CPPIBC 3.9 10/30/28	AUD	1,747,165,000	1,669,961,273

GBP/CAD	1.84		
USD/CAD	1.40		

1. The Canadian equivalent values of bonds and assets reported in the Register are based on foreign exchange rates as at March 31, 2026. This may include assets added to the Register between end of the fiscal year (March 31, 2026) and the date of this report that are notionally financed by green bond issuances that occurred during the fiscal year.

2. Auren Energia (formerly Votorantim Energia). Asset renamed following the consolidation of renewable energy assets by Votorantim S.A. and CPP Investments.

3. Infinity Solar Investment (formerly Project Spears). Asset renamed to align with external asset naming and reporting.

4. Intersect Power Operating Portfolio (formerly Proxima co-invest). Asset renamed to align with external asset naming and reporting.

5. Central California Offshore Wind Holdings and Ocean-Maple Power-Eolien Maritime France assets were transferred to Reventus Power.

6. Richmond Adelaide Centre includes 111 Richmond, 85 Richmond, 100 Adelaide, 120 Adelaide and 130 Adelaide.

7. New assets added to the 2026 Green Bond Register include: 85 Richmond, 120 Adelaide and 130 Adelaide, 1918 Eighth Avenue and Reventus Power.

Impact of renewable energy projects

For period April 1, 2025 to March 31, 2026

Investment	Location	Date of initial investment	Description	Technology	Gross capacity (GW)	CPP Investments Pro rata Capacity (GW)	CPP Investments Ownership
Auren Energia	Brazil	Dec 2017	A diversified portfolio of wind farms and solar power plants in various regions of Brazil.	Wind/ Solar	3.98	1.21	30.5%
Cordelio Power	Canada	Apr 2018	Diversified portfolio of contracted wind and solar power generation assets across North America.	Wind/ Solar	1.01	1.01	100%
Cypress Creek Renewable Bond	United States	Feb 2022	U.S.-focused utility-scale solar platform.	Solar	3.1	n.a. ¹	33% of the debt facility
Dogger Bank	United Kingdom	Jul 2023	Holdco facility to North Sea Wind Limited, owner of a 20% stake in Dogger Bank Wind Farm.	Wind	3.6	n.a. ¹	18% of the debt facility
Enbridge	Canada/ United States	May 2018	North American onshore renewable power assets.	Wind/ Solar	1.70	0.65	39%
Infinity Solar Investment	Spain	June 2022	A portfolio of solar projects in Southern Spain.	Solar	0.056	n.a. ¹	98.98% of the debt facility
Intersect Power Operating Portfolio	United States	Oct 2021	A portfolio (Proxima) of six solar projects in Texas and California.	Solar	2.3 GW capacity / 1.4 GWh battery storage	n.a. ¹	20% of the debt facility
Octopus Energy Development Partnership	Europe	June 2022	A renewable energy fund that invests in onshore renewable development opportunities in Europe.	Wind/ Solar	Under Construction	Under Construction	97%
Pattern Energy	Canada/ United States	Mar 2020	A North American renewable energy company developing and operating wind, solar, and transmission infrastructure across the United States and Canada.	Wind/ Solar	6.9	3.8	55%
Pattern (SunZia)	United States	Dec 2023	In-construction wind and transmission project in New Mexico and Arizona; expected to reach commercial operations in May 2026.	Wind	6.5	n.a. ¹	17% of the debt facility
Renewable Power Capital	Europe	Dec 2020	Platform created to invest in solar, wind and battery storage technologies across Europe.	Wind/ Solar	0.87	0.87	99%
Reventus Power	United Kingdom	June 2021	Global offshore wind platform for developing and managing offshore wind projects.	Wind	0.3	0.3	100%

1. Pro rata capacity is not available for credit investments.

Impact of energy efficiency projects

For period April 1, 2025 to March 31, 2026

Investment	Location	Date of initial investment	Description	Technology	Gross capacity (GW)	CPP Investments Pro rata Capacity (GW)	CPP Investments Ownership
Redaptive	United States	Dec 2022	Provides energy efficiency and data solutions through their offering of energy-saving, energy generating equipment and smart meters for commercial and industrial customers with projects throughout North America.	Solar	0.04	0.02	47%

Silver State North Solar Project co-owned by Enbridge, Nevada, U.S.

Octopus Energy wind turbine, Yorkshire, United Kingdom

Impact of green buildings

Qualitative summary

Investment	Location	Description	CPP Investments Ownership	Certification
1918 Eighth Avenue	United States	36-storey, 667,724 sq. ft. Class A office tower located in Seattle's Denny Triangle.	45%	LEED 4.1V EB O+M Platinum
Barangaroo Towers 2 and 3	Australia	Australia's largest urban regeneration project in the Sydney Central Business District.	36%	Green Star 6 Star rating
CentrO Shopping Centre	Germany	German shopping centre.	50%	BREEAM Excellent
First Canadian Place	Canada	72-storey, 2.8 million sq. ft. Class AAA office building.	50%	LEED 4.1V EB O+M Gold
One Centenary Way (PC II)	United Kingdom	13-storey, 286,000 sq. ft. mixed-use development with office, retail, and public space.	50%	BREEAM Excellent
Raffles City The Bund	China	Retail mall plus premium grade A twin office towers located in Shanghai.	50%	LEED Core & Shell 2009 Gold
Richmond Adelaide Centre – 85 Richmond	Canada	11-storey, 174,635 sq. ft. boutique Class A office building.	50%	LEED 4.1V EB O+M Gold
Richmond Adelaide Centre – 100 Adelaide	Canada	40-storey, 1,039,746 sq. ft. multipurpose commercial space.	50%	LEED Core and Shell Development 2009 Platinum & LEED 4.1V EB O+M Gold
Richmond Adelaide Centre – 111 Richmond	Canada	15-storey, 255,313 sq. ft. office building.	50%	LEED 4.1V EB O+M Gold
Richmond Adelaide Centre – 120 Adelaide	Canada	26-storey, 417,325 sq. ft. Class A office building.	50%	LEED 4.1V EB O+M Gold
Richmond Adelaide Centre – 130 Adelaide	Canada	34-storey, 660,291 sq. ft. Class A office building.	50%	LEED 4.1V EB O+M Gold
Waterpark Place III	Canada	1,147,337 sq. ft. Multipurpose Commercial Space.	50%	LEED Core and Shell Development 2009 Platinum

Energy Use Intensity (EUI) and Carbon Emission Intensity (CEI)

Quantitative summary

Investment	EUI ¹ (MJ/sq. ft.)	Industry Standard EUI (MJ/sq. ft.)	EUI Variation from Industry Standard	CEI ¹ (kg CO ₂ e/ sq. ft.)	Industry Standard CEI (kg CO ₂ e/ sq. ft.)	CEI Variation from Industry Standard
1918 Eighth Avenue	39.99	55.81	-28%	3.2	4.4	-27%
Barangaroo Towers 2 and 3	21.11	30.86 ²	-32%	0.29	5.43 ²	-95%
CentrO Shopping Centre	30.0	38.5	-22%	1.70	n.a.	n.a.
First Canadian Place	81.7	91.3	-11%	2.19	2.82	-22%
One Centenary Way (PCII)	55.51	59.65	-7%	2.99	3.42	-13%
Raffles City The Bund	67.11	68.26 ³	-2%	9.74	9.92	-2%
Richmond Adelaide Centre – 85 Richmond	56.5	80.83	-30%	1.80	2.8	-36%
Richmond Adelaide Centre – 100 Adelaide	62.5	80.83	-23%	1.7	2.8	-39%
Richmond Adelaide Centre – 111 Richmond	76.3	110.6	-31%	2.2	2.7	-19%
Richmond Adelaide Centre – 120 Adelaide	71.0	80.83	-12%	2.40	2.8	-14%
Richmond Adelaide Centre – 130 Adelaide	46.1	80.83	-43%	2.10	2.8	-25%
Waterpark Place III	58.7	80.83	-27%	1.3	2.8	-54%

1. Reporting period is January 1, 2024 to December 31, 2024, unless otherwise noted.

2. For Barangaroo Towers, reporting period for EUI and CEI Industry Standards is FY14 to FY25. EUI and CEI Industry Standards values reported using base building consumption and emissions. CEI values use market-based emissions and CEI Industry Standards use location-based emissions.

3. Industry Standard EUI is referring to China Standard for energy consumption of building (GB/T 51161-2016), restrict value for mall and office. The industry standard EUI is excluding heating, but the heating energy value is added to both EUI and industry standard EUI. Carbon Emission Intensity is calculated from EUI. Carbon emission factor is using International Energy Agency (IEA) 2024 v1.1 (AR6 Applied).
