April 2026

# Ahold Delhaize Green Bond Allocation Report

## as of 28 December 2025

In 2025, Ahold Delhaize continued to implement its transition plan for climate change mitigation, investing in clean, low-emissions and zero-emissions technologies. These investments are covered in our Growing Together strategy, which includes a gross cash CapEx cadence of 3% of net sales. In April 2023 and March 2024, the company issued two Green Bonds under its 2023 Green Finance Framework (“[Framework](#)”). The Framework was developed in accordance with the 2021 ICMA Green Bond Principles, including the updated appendix I of June 2022, as well as the 2023 LMA Green Loan Principles administered by the Loan Market Association (“LMA”).

## Final Terms

| Instrument (ISIN) | Issuer                          | Issue date | Maturity | Amount (€m) | Reoffer price |
|-------------------|---------------------------------|------------|----------|-------------|---------------|
| XS2596537972      | Koninklijke Ahold Delhaize N.V. | 04-04-23   | 04-04-28 | 500         | 99.851%       |
| XS2780025271      | Koninklijke Ahold Delhaize N.V. | 11-03-24   | 11-03-31 | 500         | 99.297%       |

## Use of proceeds

An amount equivalent to the net proceeds from the issuance of green instruments will be used to finance and/or refinance, in whole or in part, new or existing eligible projects (“Eligible Projects”). Eligible Projects may take the form of green Assets, Capital or Operational Expenditures that meet the Eligibility Criteria outlined in the Framework. Our great local brands continue to invest in energy efficiency, improve their refrigeration systems, further modernize their logistics fleets, transition from fossil fuels, and actively invest in renewable energy initiatives.

## Allocation report as of 28 December 2025

| Eligible green project expenditures by category (in €m)                                             | 2022       | 2023       | 2024       | 2025       | Green Bond issuance                 |
|-----------------------------------------------------------------------------------------------------|------------|------------|------------|------------|-------------------------------------|
| Green Buildings                                                                                     | 180        | 84         | 64         | 29         | ISIN: XS2596537972 (April 2023) 500 |
| Energy Efficiency                                                                                   | 16         | 220        | 97         | 70         |                                     |
| Clean Transportation                                                                                | 1          | 33         | 32         | 37         |                                     |
| Pollution Prevention & Control                                                                      | 0          | 43         | 80         | 131        | ISIN: XS2780025271 (March 2024) 500 |
| Renewable Energy                                                                                    | 0          | 3          | 11         | 9          |                                     |
| <b>Total Eligible Green Project Portfolio*</b>                                                      | <b>198</b> | <b>383</b> | <b>284</b> | <b>276</b> |                                     |
| <b>Total</b>                                                                                        |            |            |            | <b>141</b> | <b>1000</b>                         |
| Eligible Green Project Portfolio - Unallocated                                                      |            |            |            |            | 141                                 |
| Percentage of Eligible Green Project Portfolio Allocated (coverage)                                 |            |            |            |            | 88%                                 |
| Percentage of Proceeds of Green Financing Instruments allocated to Eligible Green Project Portfolio |            |            |            |            | 100%                                |

(\*) Figures are rounded

## Allocation of proceeds 2022-2025

As of 28 December 2025, Ahold Delhaize has a total eligible portfolio of €1,141 million. Of this total, Ahold Delhaize allocated 88% to two Green Bonds issued in 2023 and 2024.

- We fully allocated the net proceeds of the €500 million bond issued in April 2023 to the eligible expenditures of 2022 and 2023.
- We fully allocated the net proceeds of the €500 million bond issued in March 2024 to the eligible expenditures of 2023, 2024, and 2025.

The auditing firm KPMG Accountants N.V. conducted an external assurance engagement (“limited assurance” under ISAE 3000) of the Eligible Green Projects portfolio in the allocation report. KPMG Accountants N.V.’s report is included as an appendix.

## Ahold Delhaize Green Bond Impact Report

Ahold Delhaize reports the impact of the Green Projects using a portfolio approach. We made progress in 2025 on our sustainable ambitions. In the following sections, the impact information explained per category represents the change to the sustainability KPIs in 2025 compared to the prior year and is derived from the 2025 sustainability statements as adjusted for the Profi acquisition in January 2025. We did not include Profi's 2024 comparatives. Including Profi partially compensates for the reduction in impact information.

The changes in sustainability KPIs in 2025 may not directly result from the 2025 investments and are provided for information only. The below examples by category, financed by our Green Bond issued in 2024, represent components of our broader overall effort to accelerate the transition to reach our Net Zero ambitions.

## Green buildings

### ICMA GBP category: Green buildings

#### Allocation 2025 per 28 December 2025

|                                                       |       |
|-------------------------------------------------------|-------|
| Amount allocated to eligible green projects portfolio | €29 m |
|-------------------------------------------------------|-------|

|                                                 |     |
|-------------------------------------------------|-----|
| Share of total eligible green project portfolio | 11% |
|-------------------------------------------------|-----|

#### Impact information

|                                                 |    |
|-------------------------------------------------|----|
| Additional buildings with EPC label A or higher | 13 |
|-------------------------------------------------|----|

Throughout 2025, our bond proceeds have helped funding 6 new locations in the Netherlands, of which 5 stores and 1 distribution center, 6 new stores in Romania and 1 new store in the Czech Republic, all with an EPC Label A or higher.

## Energy efficiency

### ICMA GBP category: Energy efficiency

#### Allocation 2025 per 28 December 2025

|                                                       |       |
|-------------------------------------------------------|-------|
| Amount allocated to eligible green projects portfolio | €70 m |
| Share of total eligible green project portfolio       | 25%   |

#### Impact information

|                            |           |
|----------------------------|-----------|
| Annual electricity savings | (389) GWh |
|----------------------------|-----------|

Reduction of electricity consumption is a core component of managing energy-related emissions. While Ahold Delhaize's total electricity demand is expected to increase as part of broader decarbonization measures, energy efficiency continues to play an important role in limiting the overall environmental impact. Energy-efficient solutions are routinely incorporated into store design, refurbishment, and operational upgrades. These include the installation of LED lights, doors on refrigerated cabinets, heat recovery systems, heat pumps, improved insulation and passive doors on freezers. These improvements are enabling our brands to further enhance the energy-efficiency of our stores. Compared to the prior year, we see an increase in electricity consumption of 389 GWh. This is driven by including Profi in the 2025 figures. Excluding Profi, results show a reduction of 25 GWh compared to 2024.

- In the U.S., investments in 2025 primarily involved installing LED lighting and electrifying kitchen cooking equipment in stores, including bakery ovens, deli ovens, prepared food ovens, and fryers. Another energy-contributing efficiency measure is installing doors on refrigeration cabinets.
- In Europe, investments in the Netherlands included the installation of LED lighting and heating and cooling technologies.
- In line with the prior year, Albert Czech Republic invested in new LED lighting, improvements in building insulation, and efficient ventilation and air-conditioning technologies.
- Mega Image invested in LED replacements, installation and replacement of air-conditioning systems with highly efficient technologies and other efficiency measures for the buildings. These investments include energy compensation batteries, electric ovens, and represent expenses for the modernization and remodeling of stores to use more environmentally friendly equipment and improve the energy certificate.

## Pollution Prevention & Control

ICMA GBP category: Pollution prevention and control

Allocation 2025 per 28 December 2025

Amount allocated to eligible green projects portfolio €131 m

Share of total eligible green project portfolio 47%

Impact information

Estimated annual GHG emissions reduced 109 716 tCO<sub>2</sub>e/year

Reduction in average refrigerant charge (FY25 vs FY24) 110 GWP

In 2025 we have further progressed towards our goal of minimizing refrigeration leakage and reducing food and plastic waste. Some examples include:

- Emissions from refrigerants represent the company's largest source of scope 1 emissions. We continued the transition to low-GWP and natural refrigerants at our brands. Following last year's trend, we made the most significant investments in the U.S., the Netherlands, Romania, and Serbia. This led to a reduction in our average GWP of refrigerants and a decrease in emissions.
- Investments in bottle and can collectors in the Netherlands and Romania.
- Investments in route optimization software in Belgium and electronic shelf labelling in the Netherlands to reduce food waste.

## Clean transportation

### ICMA GBP category: Clean transportation

#### Allocation 2025 per 28 December 2025

|                                                       |       |
|-------------------------------------------------------|-------|
| Amount allocated to eligible green projects portfolio | €37 m |
|-------------------------------------------------------|-------|

|                                                 |     |
|-------------------------------------------------|-----|
| Share of total eligible green project portfolio | 13% |
|-------------------------------------------------|-----|

#### Impact information

|                                        |                               |
|----------------------------------------|-------------------------------|
| Estimated annual GHG emissions reduced | 2 920 tCO <sub>2</sub> e/year |
|----------------------------------------|-------------------------------|

We made considerable progress in replacing fossil fuel-powered vehicles with electric or hybrid alternatives at headquarters and operations in Europe and the U.S. Compared to the prior year, we see a decrease in GHG emissions of 2 920 tCO<sub>2</sub>e, or 4 649 tCO<sub>2</sub>e when we exclude Profi.

Across the regions, the major initiatives included:

- Investments in EV delivery vans in the Netherlands and electric trailers and yard tractors used at distribution centers in the U.S.
- Further electrification of the company cars across several regions.
- Installation, maintenance, and repair of electric vehicle charging stations at stores and associated parking spaces, mainly in the U.S. and in Greece.

# Renewable energy

| ICMA GBP category: Renewable energy                   |        |
|-------------------------------------------------------|--------|
| Allocation 2025 per 28 December 2025                  |        |
| Amount allocated to eligible green projects portfolio | €9 m   |
| Share of total eligible green project portfolio       | 3%     |
| Impact information                                    |        |
| Increase in electricity produced on-site              | 21 GWh |

In 2025, we continued investing in renewable energy initiatives, such as:

- Investments in the maintenance of an anaerobic digestion plant in the U.S., enabling the production of biogas from food waste.
- Installing solar panels in the U.S., the Netherlands, Greece, and Romania.

To support our transition to zero-emissions energy, we signed two additional virtual PPAs in Europe in 2025. One relates to a new-to-be-built onshore wind farm in Romania, expected to become operational in 2027. The other supports the development of two new-to-be-built onshore wind farms in Finland, expected to become operational in 2028. The 2025 allocation report excludes expenditures related to virtual PPAs.

## Disclaimer

The information and opinions contained in this Ahold Delhaize Green Bond Allocation and Impact Report (the “Allocation and Impact Report”) are provided as at the date of this Allocation and Impact Report and are subject to change without notice. None of Ahold Delhaize or any of its affiliates (the “Ahold Delhaize Group”) assume any responsibility or obligation to update or revise such statements, regardless of whether those statements are affected by the results of new information, future events or otherwise. This Allocation and Impact Report represents current Ahold Delhaize Group policy and intent, is subject to change and is not intended to, nor can it be relied on, to create legal relations, rights, or obligations. This Allocation and Impact Report is intended to provide non-exhaustive, general information. This Allocation and Impact Report may contain or incorporate by reference public information not separately reviewed, approved or endorsed by the Ahold Delhaize Group and accordingly, no representation, warranty or undertaking, express or implied, is made and no responsibility or liability is accepted by the Ahold Delhaize Group as to the fairness, accuracy, reasonableness, or completeness of such information.

This Allocation and Impact Report may include forward-looking statements. All statements other than statements of historical facts may be forward-looking statements. Forward-looking statements can be identified by certain words, such as “anticipate,” “intend,” “plan,” “goal,” “seek,” “believe,” “project,” “estimate,” “expect,” “strategy,” “future,” “likely,” “may,” “should,” “will” and similar references to future periods.

Forward-looking statements are subject to risks, uncertainties and other factors that are difficult to predict and that may cause the actual results of Koninklijke Ahold Delhaize N.V. (the “Company”) to differ materially from future results expressed or implied by such forward-looking statements. Therefore, you should not place undue reliance on any of these forward-looking statements. Factors that might cause or contribute to such a material difference include, but are not limited to, risks relating to the Company’s inability to successfully implement its strategy, manage the growth of its business or realize the anticipated benefits of acquisitions; risks relating to competition and pressure on profit margins in the food retail industry; the impact of economic conditions, including high levels of inflation, on consumer spending; changes in consumer expectations and preferences; turbulence in the global capital markets; political developments, natural disasters and pandemics; wars and geopolitical conflicts; climate change; energy supply issues; raw material scarcity and human rights developments in the supply chain; disruption of operations and other factors negatively affecting the Company’s suppliers; the unsuccessful operation of the Company’s franchised and affiliated stores; changes in supplier terms and the inability to pass on cost increases to prices; risks related to environmental, social and governance matters (including performance) and sustainable retailing; risks related to data management and data privacy; food safety issues resulting in product liability claims and adverse publicity; environmental liabilities associated with the properties that the Company owns or leases; competitive labor markets, changes in labor conditions and labor disruptions; increases in costs associated with the Company’s defined benefit pension plans; ransomware and other cybersecurity issues relating to the failure or breach of security of IT systems; disruption from developments in artificial intelligence or inability to realize related benefits; the impact of adverse publicity or operational disruption related to activism or negative media coverage; the Company’s inability to successfully complete divestitures and the effect of contingent liabilities arising from completed divestitures; antitrust and similar legislation; unexpected outcomes in the Company’s legal proceedings; additional expenses or capital expenditures associated with compliance with federal, regional, state and local laws and regulations; unexpected outcomes with respect to tax audits; the impact

of the Company's outstanding financial debt; the Company's ability to generate positive cash flows; fluctuation in interest rates; the change in reference interest rate; the impact of downgrades of the Company's credit ratings and the associated increase in the Company's cost of borrowing; exchange rate fluctuations; inherent limitations in the Company's control systems; changes in accounting standards; inability to obtain effective levels of insurance coverage; adverse results arising from the Company's claims against its self-insurance program; the Company's inability to locate appropriate real estate or enter into real estate leases on commercially acceptable terms; and other factors discussed in the Company's public filings and other disclosures.

Forward-looking statements reflect the current views of the Company's management and assumptions based on information currently available to the Company's management. Forward-looking statements speak only as of the date they are made and the Company does not assume any obligation to update such statements, except as required by law.

As noted throughout this Allocation and Impact Report, the Company frequently applies estimates, makes assumptions or exercises judgment in reporting on information, particularly where data is imperfect or incomplete, or where Company management's subjective determination is otherwise necessary. The use of estimates, assumptions and judgment creates inherent uncertainty, and actual results may differ from those reported under these circumstances.

None of the future projections, expectations, estimates or prospects in this Allocation and Impact Report should be taken as forecasts or promises nor should they be taken as implying any indication, assurance or guarantee that the assumptions on which such future projections, expectations, estimates or prospects have been prepared are correct or exhaustive or, in the case of assumptions, fully stated in the Allocation and Impact Report. No representation is made as to the suitability of any green bonds ("Green Bonds") to fulfil environmental and sustainability criteria required by prospective investors. Each potential purchaser of Green Bonds should determine for itself the relevance of the information contained or referred to in this Allocation and Impact Report or the relevant Green Bonds documentation for such Green Bonds, including, but not limited to, the relevant prospectus, offering circular and the Framework. However, nothing in this Allocation and Impact Report is intended to modify or add to any covenant or other contractual obligation undertaken by Ahold Delhaize in any Green Bonds that may be issued in accordance with the Framework. This Allocation and Impact Report does not create any legally enforceable obligations against Ahold Delhaize; any such legally enforceable obligations relating to any Green Bonds are limited to those expressly set forth in the notes governing such Green Bonds.

This Allocation and Impact Report does not constitute a recommendation regarding any securities of Ahold Delhaize or any member of the Ahold Delhaize Group. This Allocation and Impact Report is not, does not contain and may not be intended as an offer to sell or a solicitation of any offer to buy any securities issued by Ahold Delhaize or any member of the Ahold Delhaize Group. In particular, neither this document nor any other related material may be distributed or published in any jurisdiction in which it is unlawful to do so, except under circumstances that will result in compliance with any applicable laws and regulations. Persons into whose possession such documents may come must inform themselves about, and observe, any applicable restrictions on distribution. Any decision to purchase or otherwise invest in any Green Bonds should be made solely on the basis of the information to be contained in any offering document provided in connection with the offering of such Green Bonds. Prospective investors are required to make their own independent investment decisions.

## **Assurance report of the independent auditor**

To: the Management Board of Koninklijke Ahold Delhaize N.V.

### ***Our conclusion***

We have performed a limited assurance engagement on the Eligible Green Project Portfolio as included in the Ahold Delhaize Green Bond Allocation Report as of 28 December 2025 (on pages 1 and 2 of the 'Green Bond Allocation and Impact Report 2025'), hereafter referred to as the 'Report' of Koninklijke Ahold Delhaize N.V. based in Zaandam (the 'Company').

Based on the procedures performed and evidence obtained nothing has come to our attention that causes us to believe that the Report is not, in all material respects, prepared in accordance with the applicable criteria.

### ***Basis for our conclusion***

We performed our limited assurance engagement in accordance with Dutch law, including Dutch Standard 3000A 'Assurance-opdrachten anders dan opdrachten tot controle of beoordeling van historische financiële informatie (attest-opdrachten) (assurance engagements other than audits or reviews of historical financial information (attestation engagements))', which is a specified Dutch standard that is based on the International Standard on Assurance Engagements (ISAE) 3000 'Assurance Engagements Other than Audits or Reviews of Historical Financial Information'. This engagement is aimed to obtain limited assurance. Our responsibilities in this regard are further described in the 'Our responsibilities for the limited assurance engagement of the Report' section of our report.

We are independent of Koninklijke Ahold Delhaize N.V. in accordance with the 'Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten' (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence). Furthermore, we have complied with the 'Verordening gedrags- en beroepsregels accountants' (VGBA, Dutch Code of Ethics).

We believe the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion.

### ***Applicable Criteria***

The Ahold Delhaize Green Bond Allocation Report needs to be read and understood together with the reporting criteria. Ahold Delhaize is solely responsible for selecting and applying these reporting criteria, taking into account applicable law and regulations related to reporting.

The reporting criteria used for the preparation of the Green Bond Allocation Report are the Eligible Criteria as described in paragraph 4.1 Use of Proceeds in the Ahold Delhaize Green Finance Framework dated March 2023. The framework is available at <https://aholddelhaize.com/investors/debt-information/green-bonds/>.

### ***Materiality***

Based on our professional judgement we determined materiality levels for each relevant part of the Green Bond Allocation Report. When evaluating our materiality levels, we have taken into account quantitative and qualitative aspects as well as the relevance of information for both stakeholders and the Company.

### ***Scope of the group limited assurance engagement***

Ahold Delhaize is the parent company of a group of entities. The Green Bond Allocation Report incorporates the consolidated information of this group of entities.

Our limited assurance engagement procedures for this engagement consisted of both limited assurance engagement procedures at group level (consolidated) as well as at group components. We have determined the scope of our assurance procedures in such a way that we perform sufficient procedures enabling us to provide a conclusion on the Eligible Green Project Portfolio. We considered, among other things, the management structure of the group, the nature of the activities of the group components, the business processes and controls and the industry in which the entity operates.

On this basis, we determined the nature and extent of the procedures at group and component level that were necessary to be performed.

### ***Responsibilities of the Management Board for the 'Report'***

The Management Board is responsible for the preparation of the Report in accordance with the applicable criteria. It is important to view the Eligible Green Project Portfolio in the context of these Eligibility Criteria.

Furthermore, the Management Board is also responsible for such internal control as it determines is necessary to enable the preparation of the Report is free from material misstatement, whether due to fraud or error.

### ***Our responsibilities for the limited assurance engagement of the Report***

Our responsibility is to plan and perform our limited assurance engagement in a manner that allows us to obtain sufficient and appropriate assurance evidence for our conclusion.

The procedures performed in this context differ in nature and timing and are less extent as compared to reasonable assurance engagements. The level of assurance obtained in a limited assurance engagement is therefore substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

We apply to the Nadere Voorschriften kwaliteitsmanagement' (NVKM, Regulations for Quality management) and accordingly maintain a comprehensive system of quality management including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Our limited assurance engagement included among others:

- Identifying areas of the Report where a material misstatement, whether due to fraud or error, are most likely to occur, designing and performing assurance procedures responsive to these areas, and obtaining assurance information that is sufficient and appropriate to provide a basis for our conclusion;
- Reviewing the application of the Eligibility Criteria used in the preparation of the Eligible Green Project Portfolio in the Ahold Delhaize Green Bond Allocation Report;
- Considering the internal control relevant to the limited assurance engagement in order to select assurance procedures that are appropriate in the circumstances, but not for the purpose of expressing a conclusion on the effectiveness of the Company's internal control;

- Making inquiries with relevant staff at Ahold Delhaize responsible for the data collection and reporting of the Eligible Green Project Portfolio and reconciling the Eligible Green Project Portfolio with underlying records of the Company;
- Performing analytical review procedures to determine whether the information in the Eligible Green Project Portfolio is plausible and in line with the Eligible Criteria;
- Evaluating the presentation, structure and content of the Ahold Delhaize Green Bond Allocation Report; and
- Considering whether the Ahold Delhaize Green Bond Allocation Report as a whole, including the disclosures, reflects the purpose of the reporting criteria used.

We have communicated with management regarding, among other matters, the timing of the limited assurance engagement and significant findings that we identify during our limited assurance engagement.

Amstelveen, 20 April 2026
